BOOTS AND SHOES

GARMONT - T8 ATHENA WOMAN COYOTE

CODE: GR-003058

BRAND: GARMONT

Construction and fit

T8 ATHENA is a tactical boot specifically developed around the anatomical structure of women's feet, providing support, stability, and comfort during extended wear. The dedicated women's last features enhanced arch support and a slightly raised heel, designed to accommodate the different structure of the female Achilles tendon and promote a more natural stride.

Upper and ventilation

The upper combines high-quality suede leather with breathable polyester, providing a durable construction suitable for demanding environments while maintaining airflow and moisture control.

Dual-density EVA midsole

The dual-density EVA midsole provides cushioning and shock absorption, helping to reduce foot fatigue during extended activities. The construction is particularly suitable for long hours of standing, patrolling, and tactical training.

Recommended use

Lightweight yet durable, T8 ATHENA is designed for professional activities, law enforcement, and military operations. Its combination of comfort, protection, and stability makes it suitable for field use and everyday tactical activities across varied terrain.

FEET SIZE: 35 , 36 , 37 , 37.5 , 38 , 39 , 39.5 , 40 , 41 , 41.5 , 42 , 42.5 , 43
