JACKETS

DEFCON 5 - REPTILE THERMAL SHIRT LEVEL 3 FULL ZIPPER

CODE: D5-REPTILE-III

BRAND: DEFCON 5 - 2026

The **D5-REPTILE modular technical clothing system** consists of three separate garments, available individually and designed to be worn either on their own or combined according to weather conditions and the level of protection required.

Developed around the principle of **layering**, the system allows the user to quickly adapt their clothing to changes in temperature, wind and humidity. Designed to be worn over a base layer in direct contact with the skin, the system is structured around three functional levels, each providing specific performance characteristics.

The **D5-REPTILE-II** forms the **second layer**: a close-fitting garment featuring a hybrid construction that combines brushed thermal fabric with technical stretch inserts. Its design provides an effective balance of **insulation, comfort and freedom of movement**, offering a close fit without restricting mobility.

The **D5-REPTILE-III** represents the **third layer** and is made entirely from brushed thermal fabric. Its hooded construction enhances insulation and provides additional protection for the **head, neck and upper body**, making it particularly suitable for colder conditions.

Completing the system, the **D5-REPTILE-IV** is the **outer layer**: a lightweight, stretch and non-thermal technical jacket designed to provide an effective barrier against **wind and moisture**, while maintaining low weight and freedom of movement.

The three garments can be configured according to the conditions: worn individually in milder weather, partially combined during transitional seasons, or used together when **greater insulation and protection** are required. The coordinated construction of the different layers promotes a close fit while allowing the wearer to maintain mobility during activity.

A **versatile, modular and adaptable system**, designed for operational and outdoor activities where changing environmental and weather conditions require flexible clothing solutions.

COLOR: BLACK , CLAY GREEN

SIZE: S , M , L , XL , XXL , XXXL

WEIGHT: 0.40 KG
