TACTICAL LIGHTS

MACTRONIC BLACK EYE 1550 - RECHARGEABLE HIGH POWER FLASHLIGHT 1550 LUMENS 3200 MAH

CODE: MAC-THH0046

BRAND: MACTRONIC

BLACK EYE® 1550 is an extremely effective Mactronic® rechargeable hand torch which is part of the Tactical Line. The high-quality CREE XHP50.2 LED power source in the highest mode generates up to 1550 lumens, which makes this model the most powerful flashlight in the entire BLACK EYE® series and the maximum beam distance in this mode is over 300 meters. Thanks to the housing made of aircraft aluminum, 1.5 meters shock resistance from and the certified protection class at the IP65 level, the BLACK EYE® 1550 tactical flashlight will be able to withstand the most difficult working conditions to which the user will expose it, such as water or dust. As in other models from the BLACK EYE® series, also here we are dealing with a very all-purpose design - the flashlight can be successfully used for all tactical and patrol missions, as a part of personal equipment, or as a light source on a firearm with the use of an additional Picatinny / magnetic mount. The set includes an efficient 3.7V lithium-ion battery with a capacity of 3200 mAh, and thanks to the two included power adapters, we can charge the flashlight from a traditional 230V or a 12V car socket.

Weight: 500 grams
