TACTICAL LIGHTS

MACTRONIC SIRIUS M10 - MULTI-FUNCTIONAL FLASHLIGHT 1000 LUMENS 650 MAH

CODE: MAC-THH0171

BRAND: MACTRONIC

EDC Sirius flashlights were designed for survival enthusiasts, people always looking forward for another adventure. The Sirius M10 is the family's smallest model, at only 44.5 g. But do not be fooled by its tiny size. The device features a 1000 lumen rated XP-L HI LED capable of illuminating the surroundings at a distance of up to 100 m. A true maverick in the world of portable lighting. A flashlight the size of a small finger, easily held in every pocket, backpack or jacket. An important piece of your EDC gear. The flashlight's controller also has weaker lighting modes that ensure a longer operating time with one recharge - up to 6.4 hours at 100 lumens. The Sirius M10 remembers the last used mode and uses an interlock for preventing accidental activation. The flashlight's 16340 battery can be recharged via a magnetic cable connected to a USB socket / adapter. The flashlight's elegant housing in coyote brown is knurled for better grip with dirty or begloved hands. The product's protection class is IPX8. The device comes with a clip for attaching it to various pieces of garment or equipment and a magnetic charging cable.

Weight: 80 grams

WEIGHT (KG): 0.08
