UYN MAN FUSYON DEFENDER UW SHIRT LG_SL.ROUND NECK

CODE: UYN-U100307

BRAND: UYN

Designed for those who demand maximum comfort during physical activity, this technical shirt offers a combination of advanced technologies that ensure support, protection, and freedom of movement.

Main features:

- **Hypermotion** - Thanks to its exclusive seamless shoulder construction, this shirt guarantees maximum freedom of movement, reducing restrictions and improving body posture during every motion.
- **Shoulder Pads** - The 3D knit fabric, with increased thickness, provides breathable protection, cushioning weight and absorbing vibrations when wearing a backpack or carrying equipment, ensuring long-lasting comfort during intense activities.
- **Coolvent** - The channelled inner surface promotes constant airflow, quickly absorbing sweat, cooling the body during activity, and keeping the skin dry even in the most demanding conditions.
- **Drylight** - Capable of rapidly transporting moisture outward thanks to its ultra-absorbent knit structure, Drylight ensures a comfortable and dry fit in all situations, avoiding bothersome sweat accumulation.
- **Resifit** - The knee and elbow joints, which are exposed to stress during physical exercise, are protected by a system of three-dimensional chambers that creates an insulating air layer, reducing the risk of irritation and enhancing comfort.
- **Iso Chambers** - Iso Chambers increase insulating power, preventing the cooling of the body's most sensitive areas, protecting against cold and maintaining stable body temperature even during intense physical effort.
- **Heatmemory** - The insulating air chambers trap body heat and prevent cooling—particularly useful when muscles cool down after physical activity. The body stays warm and efficient, improving recovery.

Perfect for any activity, this technical shirt is ideal for those seeking optimal support during outdoor sports, intensive training, or long hikes, thanks to its combination of innovative technologies that ensure comfort, protection, and freedom of movement.
