#### Key Features:

- **3D Knit Fabric:** The thicker 3D knit fabric provides breathable protection, cushioning the weight and absorbing vibrations while wearing a backpack or carrying gear, ensuring comfort even during long periods of use.
- **Coolvent:** The channeled inner surface promotes constant airflow, quickly absorbing sweat, cooling the body during activity, and keeping the skin dry for maximum comfort.
- **Iso Chambers:** The Iso Chambers' structure increases insulating power, preventing the cooling of sensitive areas of the body, especially during prolonged exposure to the elements.
- **Resifit:** Knees and elbows are supported by a 3D chamber system that creates an insulating air layer, reducing stress on these high-stress areas during physical activity.
- **Heatmemory:** Insulating air chambers trap body heat, protecting against cooling, which is particularly important when muscles cool down after intense exercise, keeping the body warm and efficient.
- **Hypermotion:** Exclusive seamless shoulder construction ensures maximum freedom of movement and postural support, allowing the body to move naturally without restriction.
- **Drylight:** In areas where sweat accumulates during exercise, **Drylight** technology ensures comfort by quickly transporting moisture to the outside using an ultra-absorbent and highly breathable knitting technique.
